Blower

Cooling fan specialized for high static pressure. Related product: Splash Proof Blower p. 331

Model Numbering System Not every combination of the following codes or characters is available. Contact us for an available combination.

How to Read Specifications (DC fan) The following is a sample. See respective product pages for detailed information.

| Model no. | Rated voltage | Operating voltage range | Rated current | Rated input | Rated speed | Max. airflow | | Max. static pressure | | SPL | Operating temperature | Expected life |
|--------------|---------------|-------------------------|---------------|-------------|----------------------|-----------------------|-------|----------------------|------------------------|----------|-----------------------|----------------------------|
| Woderno. | [V] | [V] | [A] | [W] | [min ⁻¹] | [m ³ /min] | [CFM] | [Pa] | [inchH ₂ 0] | [dB (A)] | [°C] | [h] |
| 9GA0412G7001 | 12 | 7 to 13.8 | 0.17 | 2.04 | 13100 | 0.36 | 12.7 | 192 | 0.77 | 42 | -20 to +70 | 40000/60°C (70000/40°C) |

| Rated voltage | \cdot This is the necessary voltage to drive the fan. E.g.) 12 VDC, 24 VDC, 48 VDC |
|-------------------------|--|
| Operating voltage range | \cdot The voltage range over which fan operation is guaranteed. |
| Rated current | \cdot The current when the fan is operating at rated voltage (at free air). |
| Rated input | \cdot The power value when the fan is operating at rated voltage (at free air). |
| Rated speed ····· | \cdot The speed when the fan is operating at rated voltage (at free air). |
| Max. airflow ····· | \cdot The airflow at 0 Pa static pressure when the fan is operating at rated voltage. (Measured using the double chamber method) |
| Max. static pressure | \cdot The static pressure at 0 m³/min airflow when the fan is operating at rated voltage. (Measured using the double chamber method) |
| SPL ····· | \cdot A-weighted sound pressure level (SPL) when the fan operates at the rated speed. |
| | For the measurement method, see the Technical Materials section in the catalog. |
| Operating temperature | \cdot The temperature range over which fan operation is guaranteed (Non-condensing). |
| Expected life ······ | \cdot Service life hours that 90% of bearings will survive without failing when continuously operated at the rated voltage and 60 $^\circ$ C |
| | temperature. Expected life at 40°C is for reference only. |
| | For more information, please refer to the technical material section. |
